

EIGE's 2019-2021 Single Programming Document

In 2019-2021, EIGE will work to further refine the quality of its unique products: measuring progress through the Gender Equality Index, reviewing the implementation of the Beijing Platform for Action and updating and communicating the gender statistics database. EIGE will also support the Member States in strengthening institutional responses to support women victims of violence and reporting on progress.

Through the work on gender budgeting within the EU Structural and Investment Funds the Institute will develop guidance for the relevant authorities of the Member States and the European Commission on a more effective use of these funds. EIGE's online platform on Gender Mainstreaming has gathered information that will allow for reflection on the progress made in this area over the 25 years following the Beijing Platform for Action.

Information gathered on gender-related challenges within and through European education and training systems will help the European Commission and the Member States identify effective policies and measures, in line with the Paris declaration of 2015 and the implementation of the European Pillar for social rights.

Amended 12/06/2019
