

Update of GEAR tool

Apžvalga

Description

EIGE is updating its tool for Gender Equality in Academia and Research – GEAR tool. The project will identify policy and legal developments in gender mainstreaming in the policy area of research in the EU and all Member States.

We will use the findings to align the content of the GEAR tool with Horizon Europe's provisions. The structure of the GEAR tool will also get a refresh to make it more user-friendly and accessible for users.

The update will be ready in the first quarter of 2022.
