

Stop FGM

The Hospital San Camillo Forlanini was in charge of training health care professionals; Irpps- Cnr carried out a research and the association NoDi was in charge of raising awareness for migrants and mapping services and meeting points used by migrants' communities. A DVD was produced by No.Di. itself (not available on line). In the whole Lazio Region 800 women with or at risk of FGM took part to meetings. A web site was designed hosting an on line forum for exchanging experiences.
