

# National Study on violent deaths within the couple

For the fifth consecutive year, the Victim Delegation has identified, for the Ministry of the Interior, the violent deaths occurred within the couple. The method used is to exploit telegrams and syntheses of police and articles in the national and regional press, identify as assassinations, murders and violence or death committed against a life partner, man or woman, regardless of their status. The number of cases is then checked with departmental bases in each district police or the gendarmerie.

**Relation:** General Directorate of National Police and General Directorate of Gendarmerie
