

The approach of quality in home places, listening, information and guidance of women victims of violence

Violence against women, including the results of the national survey conducted in 2000 among 7000 women reveals the extent and diversity of manifestations, constitute a priority area of ?? intervention of the State, which seeks to provide concrete evidence of his involvement in the fight against this social phenomenon unacceptable. The fight against the violence works in particular by strengthening networks with national and local levels, through training of professionals and information campaigns, the development of prevention and support measures for women victims of violence.
