

# Committee Report 2007/08:SoU14. Children Policies and Their Direction

Description of the National Plan of Action on FGM, the FGM Knowledge Pool website, the guidelines for all the concerned professionals, the four regional conferences and the document signed by religious leaders. Also: local activities all over the country with preventive projects going on, and the \*National Network to Combat FGM. The document also discusses why male circumcision is legal while FGM is not, since several motions from MPs now have raised the issue (suggesting a gender-neutral ban on circumcision).
