

Kaikki ihmisiä koskevat tilastot tuotetaan ja analysoidaan sukupuolen mukaan eriteltyinä

Aims and objectives

To ensure that gender-disaggregated statistics, which are needed as the basis of gender mainstreaming, are available and used as a basis of policy making.

Results and impact

According to the final report of the Gender Equality Action Plan 2008-2011, ministries have made progress, but the different research centres serving the ministries are not producing sufficient amount of sex-disaggregated data. The analytical usage of statistics remains a problem.

Creator/owner/responsible institution

All ministries

Contents/activities/services

The Gender Equality Action Plans since 1997 have required all ministries to produce gender disaggregated statistics. There has not been more specific guidance or goals.
