

Sukupuolisilmälasit käyttöön!, Loppuraportti

This final report describes the key measures and results of the national gender mainstreaming projects as well as experiences gained during the different phases of the projects. The report also assesses to what extent the projects reached their goals and how successful the project implementation was. The assessment is based on the estimations of the persons implementing the projects as well as on questionnaires sent out to various target groups. Finally, the report summarises the material produced within the projects.
