

# Report Analysing Intersectionality, in Gender Equality Policies, for Spain and the EU

"this report attempts to draw out some prospects for the future of

intersectionality in the Spanish polity, emphasizing possible points of contention or resistance that might be found around intersectionality and the European discourse on diversity. It also proposes some hypotheses about the consequences of the absence of an intersectional point of view among public and non-governmental actors, and of a simultaneously dominant unitary approach, for the reproduction of a wide range of inequalities" (p.4)
