

Comune di Rovereto

Rovereto Municipality (Servizio Personale e Istruzione e il Servizio Attività Sociali del Comune di Rovereto) has been certified a family-friendly municipality within the framework of the work and family audit. The successful certification in 2012 underlines the strong commitment made by the family business in the area of family friendliness and reconciliation of work and family life. Their efforts are to achieve a good balance between work and the family. A particularly important aspect is the focus on optimum working hours and work organisation for all. Another important aim pursued by the team is the establishment of awareness of the close connection between work and the family among upper management on all levels. The key is close cooperation and communication across all company departments: after all, an informed employee is a motivated employee.
