

Gender Equality in Academia and Research

Gender Equality Report: Monitoring progress towards gender equality in the university (PT)

University of Beira Interior (UBI) was the first university in Portugal to set up a gender equality plan. The pioneer work of UBI in this field is well-known in the country. A thorough initial assessment (2010-2011) of the gender equality state-of-play of the university preceded the development of the Gender Equality Plan. UBI's Plan established as a measure the elaboration of sex-disaggregated statistics about teaching and non-teaching staff, and students. Since 2012, Gender Equality Reports have been prepared on an annual basis to monitor the progress towards gender equality in the university. These reports are publicly accessible and build on the initial assessment carried out early in the process of setting up UBI's gender equality plan. The analysis provided in the reports considers the gender balance in terms of disciplines taught and on decision-making and leadership positions, the gender pay gap, the use of measures to reconcile professional and personal life (like flexible working hours), a gender analysis of the utilisation of leaves, and information about the number of students disaggregated by sex and faculty.
