

Activity of Väter Experten Netzwerk (VEND) (Fathers Expert Network)

Aims and objectives

The networks vision is a society in which working men can live in close connection with their children. In cooperation with companies, political decision-makers and social groups, the Fathers' Network argues strongly that men can be both committed workers and fathers. The network aims to support them through their work, so that they can be accepted as fathers in their professional environment and can also lead fulfilling private lives.
