

Administrative data sources on gender-based violence in the EU: Leaflet

This leaflet presents an overview of the study carried out by the European Institute for Gender Equality (EIGE) on mapping the administrative data sources on gender-based violence in the EU-28.

Administrative data provide detailed information on how justice, police, health and social services respond to incidents of gender-based violence. It reflects what is recorded by an organisation interacting with a victim or perpetrator, but cannot reflect the prevalence of gender-based violence due to under-reporting.
