## Quality assurance process

The informant: "District courts are supervised by regional courts, which check the statistics and make sure that they are correct. So, we have a control system in place. It is based on our Instruction on Data Recording and Statistical Services. It is even more strict with respect to prosecutors because there is one more level of control. They do it very diligently. It is somewhat looser when it comes to the courts because the hierarchy is not such. Regional courts control district courts, but the highest court keeps its own records."
