* Violence in the Family

Purpose of data collection

- Monitoring
 - Ensure victim protection from perpetrator
 - Plan capacity
 - Accountability
-

Data available on

Victim

Background information

- Age

- Sex
- Nationality
- ID
- Name
- Ethnicity
- Marital status
- Dependants

Other: Employment status, profession, number of children, whether they use substances or have any psychiatric diagnosis

Relationship with perpetrator

- Yes

Type of relationship: Family member (spouse, mother, father, brother, sister, son, daughter, grandparent, grandchild, person living under the same roof)

Repeatedly suffering from GBV

- Yes
-

Perpetrator

Background information

- Age
- Sex
- Nationality
- ID
- Name
- Ethnicity

- Marital status
- Dependants

Other: Profession, employment status, number of children, re-offender, whether they use substances or have any psychiatric diagnosis

Relationship with victim

- Yes

Additional information: This means that it is recorded whether there exists a previous relationship between victim and offender (e.g. family, intimate partner) or not (stranger).

Re-offending

- Yes
-

Witness

Background information

- No information collected on Background information
-

Relationship with victim/perpetrator

- No

Incident description by witness

- No

Children witnessing IPV incident

- No information available

Incident

Code system used

- No codes used

Description of incident

- Date/time
- Harm/injuries
- Location
- Type of violence

Other: Summary of incident.

Protection order

- No

Civil justice data

- Yes

Additional information: Not in a way that can be under statistical analysis.

Incident respond resources

- Human resources
- Financial resources
- Other resources

Prosecution process

- ✗ This administrative data source does not collect information on Prosecution process

Outcomes

Perpetrator

N. of cases resulting in arrest

- No

List of offenses

- No

* Some information might be collected for the summary of the case: sentencing, data on probation and data on prisons.

Victim

Death as result of incident

- Yes

* No data about this information is collected in the SPSS data base but in manuscript data collection for the shelter. Some information might be collected for the summary of the case - Sentencing, data on probation and data on prisons

Characteristics

Storage System

- ✓ In paper form
- ✗ Electronically (single files)
- ✗ Electronically (database)

Other: SPSS data base. In paper form: shelter data.

Frequency of updating

- Monthly
-

Quality assurance process

The data is collected based on a questionnaire that covers many aspects and information concerning the victim and perpetrator of domestic violence. The data is collected based on two different questionnaires – one for the line 1440 and one for the shelter cases. Every member of the staff recording the data uses the suitable questionnaire for every case. The Association collects data for more than 10 years. This helps us to compare trends and fluctuation of the issue of domestic violence throughout the years. The data is monthly updated and stored electronically in an SPSS database, so it can be available and retrievable.

Comparability

- ✓ Geographical
 - ✗ Over time
 - ✗ None
-

Timeliness

Additional information: The data is monthly updated and stored electronically in an SPSS database, so it can be available and retrievable.

Current developments

No plans.

Relation with third parties

Reported to third parties

Yes

Name of organisation:

The Police, the Global Network of Women's Shelters

Used by third parties:

No

Reporter

- Victim
- Witness
- Offender

Other: The Social Welfare Services and the Police as appropriate
