 - ✗ Stalking
-

Used as indicator

- Yes
- ✓ Monitoring (trend data)
- ✗ Evaluation

Other: Research, public accessibility

Data available on

Victim

Perpetrator

Background information

- Age

- Sex
- Nationality
- ID
- Name
- Ethnicity
- Marital status
- Dependants

Incident

Incident

Other content: Offender data, prosecution, gender, age, location of the offence, previous sanctions, detention, year of the offence, permanent residency and outcome of the prosecution,

Criminal statistics on sexual violence

Criminal statistical data included

- Yes

Additional information: On offender and the incident.

Characteristics

Reference period

1 year

Frequency of updating

Annually

Validation

- Yes

Additional information: Compatible with the criminal offences defined by the Criminal Code
Partly with EUROSTAT

Compilation

It is regulated by the act on the national statistics which determines in details which data can be gathered by the state statistic

Quality assurance process

- Yes

Brief description: There are strict instructions in the courts how to fill in database. data are gathered for decades and is standardised - it is in accordance with the penal code.

Accuracy

Good. It is accurate.

Reliability

Good. it is reliable. Limitation is that it relates to the offences in the penal code but there are other data that can also be collected but are not.

Timeliness

Good. For the state statistical purposes once a year is enough.

Comparability

- ✓ Geographical
- ✓ Over time
- ✗ None

* If the penal code changes and new offences are introduced that data can not be completely compatible

Current developments

There are discussions to collect more detailed data on violence against women. There was a questionnaire developed internationally and used in Slovenia. It was useful but there is a process of turn it into the new statistical product.
