- Sex
- Nationality
- ID
- Name
- Ethnicity
- Marital status
- Dependents

Relationship with perpetrator

- Yes

Perpetrator

Background information

- Age
- Sex
- Nationality
- ID
- Name
- Ethnicity
- Marital status
- Dependents
Incident

**Incident**

- Yes

**Other content:** Victim: name/surname, family name, place of birth, age, gender, nationality, ID number, relationship with the perpetrator, re-victimisation.
Perpetrator: name/surname, family name, place of birth, age, gender, nationality, ID number, relationship with the perpetrator, recidivism. Other relevant data: application itself contains questions about time, place, manner of execution, the execution object, if any. In addition, detailed description of the act is entered. Also, information like child custody, divorce and similar are entered. All of this information is important to be able to raise the bill of indictment (e.g. information on history of felonies/misdemeanours).

Accuracy
Good. This database is a good basis for further actions and keeping up with current trends. The statistical product is accurate since it is based on electronic database ISMUP.

Reliability
Good. These are official figures and they are reliable.

Timeliness
Good. ISMUP is a highly functional system concerning the data frame because the length of the data availability and the event or phenomenon is very short and describe data can be retrieved at any time.
Comparability

✓ Geographical
✓ Over time
✗ None

Current developments

There is an ongoing adaptation of the data base because of the changes in the Criminal Code and Law on Criminal Procedure and because of the need for harmonization with existing regulations. The focus of the changes is on regularly updating. Also, the competent Ministry of Social Policy and Youth now requires a different way of recording and reporting the data.
