---

## Quality assurance process

- No
- 

## Accuracy

Problems. It would be good to make the raw data public

---

## Reliability

Limitations. There are methodological questions about the collection of the data that should be renewed.

---

## Timeliness

No information. It gives a proper base to run comparative retrospective analyses, as the annual data comes out regularly.

---

## Comparability

- ✗ Geographical
  - ✓ Over time
  - ✗ None
- 

## Current developments

The competence of the development belongs to the data collection method.

---

## External link

**Links:** The data base on which the KSH statistics are constructed is connected to external data base

---

\* Because of estimated high rate of latency the figures concerning VAW are always to be dealt with consideration. These figures are based on criminal statistics, so only those incidents are included when the offender was found guilty. The data of the victims is collected during the procedure as well.
