

Evaluation fiche for support to authors

3 questionnaires and a test have been elaborated by professionals. One questionnaire is to be fulfilled by the author itself. The other two questionnaires and the test have to be performed by the professional. It should in principle not take more than 15 minutes.

Aims and objectives

The goal is to give professional a quick screening tool to evaluate type of author and risks. Help any professional of any type of background (police, justice..) to be able to put a correct diagnosis on the author in a limited amount of time.

Results and impact

The tool has just been finalised. It will be tested on the ground in September.
