

Information material for Practitioners on Violence against women - When patients are affected by violence.

The brochure addresses different issues relevant for practitioners, such as:

- injuries and illness as effects of violence
 - domestic violence
 - sexual violence
 - how to recognise violence as causes of injuries
 - what practitioners can do
 - where to seek further support.
-

Aims and objectives

The information brochure provides an overview of the main issues to be considered when practitioners are dealing with victims of violence.
