

Annex 1 A - Female immigrants and descendants in Denmark with origin where FGM is performed (divided by origin). B - Female immigrants and descendants in Denmark with origin where FGM is performed (divided by age).

The numbers listed in annex 1, A and B are all statistical drawings from the web based national institution "Statistikbanken" (The bank of Statistics), who collects official statistic material in Denmark.

Data Collection

Year of data collection

2011

Study population

Female residents (immigrants and descendants) in Denmark with origin in countries where FGM is performed.

Prevalence data on FGM

15.116 female immigrants and descendants with origin where FGM is performed are living in Denmark (10.025 immigrants, 5.091 descendants).

Disaggregated data per country of origin

View annex 1A for detailed information about female immigrants and descendants in Denmark with origin where FGM is performed, disaggregated per country of origin.

Disaggregated data per age

View annex 1B for detailed information about female immigrants and descendants in Denmark with origin where FGM is performed, disaggregated per age.

Limitations of study

The data available on "The bank of statistics" gives no information about: - the exact number of women with FGM living in Denmark - length of stay in a country - date of birth of daughters (descendants)
