

The Power to Change - How to set up and run support groups for victims and survivors of domestic violence

Manual: How to set up and run support groups for victims and survivors of domestic violence

The manual is the result of a collaboration between feminist activists and practitioners from 5 countries – Estonia, Portugal, Italy, UK and Hungary (who co-ordinated the project). Over 2 years they have worked together through workshop sessions and email exchanges to develop this resource, drawing on their varied knowledge and experience of working with survivors of domestic and sexual violence.

Extensive consultation on the manual and its content was also carried out with specialist domestic abuse practitioners and with survivors.

The manual was published in 5 languages
