

# Tallinna Crisis Centre for Women 2005-2011

Tallinn Women Crisis Centre aims to fight against various forms of violence against women (physical, sexual, psychological and economical) through supporting victims of violence and organizing preventive activities to reduce the risk of violence in Tallinn and Harju County (ca 40% estonian population). Our primary aim is to help victims of domestic violence (together with children, if needed) and to support their exit from the circle of violence. We are the biggest women's shelter in Estonia. Our priority is to offer counseling.
