

III Programme of Action for the Prevention and Elimination of Female Genital Mutilation 2014-2017

The programme of action aims at strengthening intervention measures that prove to be crucial for the challenge of eradicating FGM. Training and capacity building of professionals who deal with the problem are foreseen, but also other target groups. It also proposes to act in a more incisive way on communities at risk, through the mobilization of NGOs, especially immigrant associations, building on an intervention network.

The budget to fund the implementation of the Programme consists of financial and human resources from all organizations that are part of the Working Group responsible for implementing it.
