

Looking The Other Way: A Study Guide to Female Victims of Violence with Disabilities

The guide targets professionals - personal assistants and employees of the social services, habilitation, rehabilitation, health care, etc. - who handle cases affecting women with disabilities, as well as provide them with support and services. The objective of the guide is to raise awareness and skills among the practitioners of various professions, so the professionals will be in a better position to provide the protection, support and assistance that women need.
