

Convenzione per le statistiche di genere tra il dipartimento pari opportunità e l'istituto nazionale di statistica

Aims and objectives

The agreement is aimed at developing sex-disaggregated statistics and specific research on gender issues, in particular on gender violence, work-life balance and women's participation to public life.

Results and impact

Surveys on gender violence, work-life balance and women's participation in public life have been carried on. Although it is not an actual agreement for the construction of systematic sex-disaggregated statistics, surveys carried out in this framework had a very important relevance in the public/political debate and have stimulated a number of bills, although not yet approved, (elaborated by ISTAT and CNEL) on this issue.
