

L'équilibre homme/femme dans la recherche luxembourgeoise: l'incidence du système national de recherche

Weblinks

Website

Aims and objectives

To present the situation of men and women in public research in Luxembourg

Results and impact

Low participation of women researchers and importance to continue to explore factors contributing to a higher participation. Also the necessity to look at participation of women in research and a later stage of their career.

Creator/owner/responsible institution

CEPS/INSTEAD

Contents/activities/services

Women in research in Europe, in Luxembourg by training level and scientific domain in the beginning of their career.
