

Monitoring media and advertising for gender equality

In line with the National Action Plan for Prevention and Elimination of Violence against Women (VAW), the depiction of women in the media and advertising is monitored through this method. At the core of this assignment, the presence and the manner in which women are depicted in the media are monitored. Additional indicators related to broader contextual parameters with respect to gender equality are furthermore taken into consideration.

Aims and objectives

- To monitor media and advertising to determine the manner in which women are depicted

Results and impact

The monitoring activities drew attention and awareness to specific issues (for example, the pay gap, reactions to abortion, violence against women). However, due to the lack of finances it has not been conducted regularly and it was not possible to broaden its scope.
