
Verankerung der Gleichstellung von Frauen und Männern in den Strategieplänen der Regionalmanagements

The sustainable implementation of gender equality in regional development requires changes of strategic planning and decision making processes, public institutions and bodies as well as project-based work. This document provides a check list of measures in order to facilitate intended developments (e.g. in regard to compatibility of family and work, education and training, mobility, local amenities, foundresses, women in agriculture, access and use of information and communication technology, gender awareness-raising)
