

Working time and work–life balance in European companies: Establishment Survey on Working Time 2004-05

The European Establishment Survey on Working Time and Work–Life Balance (ESWT) focused on working time arrangements, including flexible working hours, overtime, part-time work, work at unusual hours (shift work, night work, weekend work), childcare leave or other forms of long-term leave, and phased or early retirement. The cross-national survey examines these topics from the perspective of establishments.
