
Czech Republic country note

The LP&R network produces an annual review of leave policies and related research, starting in 2004. The review covers Maternity, Paternity and Parental leaves; leave to care for sick children and other employment-related measures to support working parents; and early childhood education and care policy. As well as policies, it provides information on publications and research. The review is based on country notes from each participating country. Each country note follows a standard format: details of different types of leave; the relationship between leave policy and early childhood education and care policy; recent policy developments; information on take-up of leave; recent publications and current research projects. Altogether, it covers 34 countries.
