

Le rapport de situation comparée

This short movie focusses on gender equality at work and on the compared situation report that firm employers of more than 50 persons have to undertake each year. Employers are encouraged by the law to carry out an analysis of men's and women's situation in the firm, and to identify the areas where inequalities exist and to define actions to remedy to them. Through testimonies of firm employers that have undertaken this mandatory exercise, this video offers some information on how to proceed.
