

PER.FOR.MA.GE 'Percorsi formativi al mainstreaming di genere'

The aim of the publication is to provide policy makers with tools on GE and GM. The manual is divided in 3 parts. The first part is devoted to the Italian legislation on GE; the second part contains tools to implement a culture of gender equality in public administrations with a special focus on the EU recommendations and the EU funds available; the third part is devoted to gender budgeting. The manual was distributed to all the regional governments, there is no evidence, however, whether and to what extent it has been used.
