

Gender Mainstreaming in Practice: A toolkit: Sectoral briefs

The integration of a gender perspective into programming and policy-making – Gender Mainstreaming – has become a key priority of UNDP. Towards this end, 'Gender Mainstreaming in Practice: A Toolkit' integrates a gender perspective into the analysis of work, home, and public life in order to improve policy-making and programming. This publication reflects the work of more than a hundred specialists, who have contributed their expertise to this collection of practical tools and guidelines, examples and illustrations. The toolkit targets public policy and development practitioners with varying levels of experience in this area; it also serves as a useful resource for NGOs and advocacy groups, students, project staff, gender specialists, and consultants. Available in English and Russian.
