
Sistema Integrado de Informação e Conhecimento

The Integrated System of Information Knowledge (SIIC) intends to support the definition, monitoring and evaluation of policies. Therefore, the reports produced, the collation of data and the monitoring of sectorial policy areas are envisioned to have a role in the whole policy cycle. The SIIC is supposed to be a system of support, collation, management, analysis and dissemination of information regarding the inequalities and compared situation in the following domains: political, social, economic and cultural life of women and men, foreseeing the interaction with universities, researchers, experts, public administration, NGOs, and citizens, taking also into account the international level.
