This tender is announced with a view to selecting the best proposal for the implementation of the study 'Female genital mutilation: estimating girls at risk' in six selected Member States. The study will contribute to EIGE's efforts to undertake regular Female Genital Mutilation risk estimations and trend assessments, ensuring comparability of data across EU Member States. If needed, the study will provide recommendations for improvement or update of EIGE's methodological approach. The study will contribute to more effective policies and services to prevent FGM and protect girls at risk.
