

# Estimation of the number of girls at risk of female genital mutilation in the EU

EIGE launches this call for tender with a goal to conclude a contract with a professional service provider regarding the study 'Estimation of the number of girls at risk of female genital mutilation in the EU'. The study will contribute to more effective policies and services to prevent female genital mutilation and protect girls at risk.

The study will contribute to EIGE's efforts to undertake regular female genital mutilation risk estimations and trend assessments, ensuring comparability of data across EU Member States by using EIGE's 2018 methodology on estimating girls at risk of female genital mutilation in four new selected countries: Denmark, Spain, Luxembourg and Austria. A comparative analysis in accordance with this methodology will cover the four selected Member States.

The tender documents are available at <https://etendering.ted.europa.eu/cft/cft-display.html?cftId=5970>

Note: EIGE is using eTendering platform for managing this call for tender, which consists of the publication of procurement documents and the management of questions and answers concerning the specifications and the procedure.

Please follow the relevant links to gain access to all procurement documents. The documents will be visible and downloadable, but in order to use some options on the eTendering website, you will need to register and log in. It is the tenderer's responsibility to check for updates and modifications to the tendering documentation during the tendering period on eTendering platform.
