

# EIGE's Gender Statistics Database

**EIGE's Gender Statistics Database: evidence for decisions**

Accurate sex-disaggregated and gender-relevant data helps track the impact of policies and reveals where more needs to be done to close gender gaps.

The Gender Statistics Database gives an accurate picture of the differences that exist between women and men in all areas of life and helps monitor progress towards gender equality in all EU's policies.

Bookmark the Database in your browser! This is why:

- **One-stop source**  
The Database provides a one-stop source for gender statistics at the Member State and EU levels. Additionally, the Database provides available data from other European countries.
- **Easy access**  
It is useful for experts and non-experts who can search fast and easily for the original data and extract the values and figures for further analysis. The website also enables the user to create and personalise different types of figures, like bar charts and time series.
- **Up to date**  
The Database guarantees access to the latest available data that is not only sex-disaggregated but also includes the situation of women and men in society.

**Data Talks!**  
Gender statistics have interesting stories to tell. When we publish important datasets, we tell their stories in easy-to-understand statistical briefs that present the latest reports across the EU Member States. They can also highlight the differences between the EU Member States and the rest of European countries.

**Contact us!** Working on a policy document, an academic paper or a media article and you can't find the data yourself? Send us your query to: [GSD@eige.europa.eu](mailto:GSD@eige.europa.eu)

The Database is used by the EU institutions to monitor progress in the area of gender equality. It is cited in academic research and is a reliable source for journalists across the EU.

This is what some users of EIGE's Gender Statistics Database shared with us:

*"I find EIGE's database user-friendly and quite analytical. Thank you, EIGE!"* (AT)

*"We cannot ask about gender equality, if we do not have the numbers. I find the database useful for my work!"* (Sweden) (SE)

*"Statistics are about hard facts. But when they are used to justify gender equality and improve children's lives, they become an indispensable tool!"* (Austria) (European Commission)

**How to cite EIGE's Gender Statistics Database?**

We are very happy that you have used our database for your work. Once you have exported a data table/calculation from EIGE's Database, please reference it like this:

EIGE's Gender Statistics Database. Title of data set (hyperlinked to the original source). Retrieved on dd/mm/yyyy
