

Gender budgeting. Mainstreaming gender into the EU budget and macroeconomic policy framework

This report presents the main research results of the gender budgeting (GB) projects implemented by the European Institute for Gender Equality (EIGE) in 2016, 2017 and 2018.

The projects supported European Union (EU) and EU Member State policy makers and practitioners to take a consistent and systematic approach to implementing gender budgeting as the main gender mainstreaming tool within EU economic governance and budgetary processes.
