

Grey literature on energy

The screenshot shows the 'Grey literature on energy' page from EIGE. It features a header with the EIGE logo and the title. Below the header, there are several sections of text and an image. The first section explains what grey literature is and where it can be found. The second section, titled 'The relevance of gender in energy', discusses how access to energy affects women and men differently and the potential for sustainable economic growth. The third section, 'Grey literature in EIGE's library', describes the collection's focus on good practices, gender indicators, and policy processes. The fourth section, 'Gender and energy policies: a missing link', highlights the need for empirical evidence and tailor-made tools. A small image of two people working on a solar panel is also visible.

Access to energy affects women and men differently. Increasing women's participation in the field of energy also has the potential to stimulate sustainable economic growth.
