

Recommendations for the EU to improve data collection on violence against women

RECOMMENDATIONS FOR THE EU TO IMPROVE DATA
COLLECTION ON VIOLENCE AGAINST WOMEN

April 2017

These recommendations aim to improve the comparability and reliability of administrative data collection on rape, femicide and intimate partner violence. The objective is not to achieve perfect comparability but to address the most critical issues in data collection and ensure that key data on these three forms of violence are available. Achieving this goal would provide an EU-wide overview of reported cases of violence and thereby enable assessment of the service response.
