

Toolkit for gender budgeting in the EU Funds

Gender Mainstreaming

EIGE Toolkit for gender budgeting in the EU Funds

EIGE has developed an online toolkit to apply gender budgeting as a gender mainstreaming tool in EU Funds processes.

Who is the toolkit for?

- managing authorities involved in EU Funds programming;
- intermediate bodies implementing EU Funds projects;
- gender equality bodies;
- staff working at EU level with EU Funds.

What does the toolkit contain?

The first three sections introduce the concept of gender budgeting and examine its relevance for the EU Funds. Section 4 offers 11 practical tools on gender budgeting, related to:

- the EU regulatory framework;
- national/sub-national programming and project-level support; and
- reporting, monitoring and evaluation.

Each tool highlights good practices from EU Member States and pinpoints links to relevant EU Funds regulations, helping users know why and where to apply the tool. EIGE's gender budgeting toolkit is available in 22 EU languages.

Why a toolkit for gender budgeting in the EU Funds?

The EU Funds are among the EU's primary tools to reduce gender gaps and inequalities. Gender equality is anchored in the Funds' legal and policy frameworks as a vital 'horizontal principle'. This means that gender equality is implemented in a cross-cutting manner across all EU Funds policy objectives.

Gender budgeting in the EU Funds would:

- ensure compliance with EU legal requirements;
- promote accountability, results-orientation, and effectiveness in the financing and management of EU Funds;
- increase transparency by boosting women's and men's involvement in budget processes;
- address the EU's objectives of sustainable growth, employment and social cohesion, and well-being of EU citizens; and
- advance gender equality for women and men in all their diversity.

EIGE has developed an online toolkit to apply gender budgeting as a gender mainstreaming tool in EU Funds processes.
