

GenderAPP

- The aim of the SATIN project is to enable end-users without prior programming skills to create their own apps.
- GenderAPP is one of the examples how gender equality and diversity perspectives are integrated in the SATIN development work.
- Checklist – gender mainstreaming in practice:
- http://cdn.satin.codemill.se/compositions/live/App_9ce1c9c691dd47fb930157abbf09094b/001/index.html
- You may also run this app from your desktop but to do so please use any of the web browsers Firefox or Chrome.
- Let me know what do you think. This is an app under development
